# 1 Introduction

The ClairCity Annual Conference (open to the public) and Consortium Meeting (just for project partners and External Advisory Board members) took place on 25-27 April in Sosnowiec, Poland. The event was hosted by the consortium partner, Sosnowiec City Hall (SOS) at the Sosnowiec Science and Technology Park (Wojska Polskiego 8, 41-208 Sosnowiec) and was a 'success' in our assessment and judging from the external participants' feedback.

The Annual Conference took place in Sosnowiec, Poland as an authorised change from our original intention of hosting the conference in Norway. This change was determined in relation to the benefits the project discovered of hosting in our pilot cities, to ensure strong and sustained relationships with each pilot city and buddy partner. Our experience hosting events in Bristol, Amsterdam and Ljubljana indicated a valuable benefit to this choice, which was also apparent in Sosnowiec.

This report summarises the activities of the ClairCity Annual Conference (open to the public) and Consortium Meeting (just for project partners and External Advisory Board members). These meetings took place on 25-27 April in Sosnowiec, Poland.

## 2 Overview of the meeting

Day 1 - Wednesday 25th April 2018 - ClairCity Annual Conference

This was the public part of the Consortium Meeting open to external people. Over 90 people took part in the Conference including Consortium Members, External Advisory Board and external participants including Mayors of Cities in the Silesian Region.

Given primarily heating is a problem for air quality in the Sosnowiec area and region, followed by transport, these issues were embraced as a general theme. Each annual conference has shifted its focus in this way, ensuring all parts of the project are scrutinised at the appropriate time over the course of the project. In Sosnowiec, Particulate Matter (PM) and policy actions in the Silesian Region as well as in other EU and non-EU cities were the main focus of the public conference.

Day 2 - Thursday 26<sup>th</sup> April 2018 – Internal Project Meeting I

Meeting for Consortium Members and External Advisory Board only.

This day was partly dedicated to the interaction with the ClairCity Cities / Regions through a semi-structured session, and partly to Work Packages (WP) specific discussions.

WP5 (Quantification) for example met with all the staff working on its various tasks; The Technical Director, the City partners and the staff behind the WP7 (Scenarios) also joined as the link between these tasks is crucial. Concrete timeframes and action plans were written down.

In a plenary session on WP4 (Engagement), ongoing and upcoming engagement activities (i.e. Promotion of the Game and App in cities and the preparation for filming, schools competition and city days) were discussed.

Day 3 - Friday 27th April 2018 – Internal Project Meeting II

Meeting for Consortium Members and External Advisory Board only.

This day was partly dedicated to the interaction with the ClairCity External Advisory Board, and partly to (plenary) Work Packages (WP) specific discussions.

References to Public Relations around the conference and pictures will be made are available on this page of the ClairCity website: <http://www.claircity.eu/2018/04/23/claircity-annual-conference-2018/>. ### 3.4 Annex - Cities / Regions Knowledge Exchange session (concept)

#### Goal:

To create a knowledge exchange platform to enable the cities/regions share ideas, challenges and solutions while learning from each other's experiences and from the consortium members with regard to air quality and climate policies, health and citizen engagement.

#### Format:

- Small groups with two cities in each group plus consortium members. After each question, we will change the groups.
- Four main questions to be discussed.
- One rapporteur to note on flipchart.
- Plenary feedback and discussion at the end.

#### Questions around four topics:

1. Measuring air pollution and climate related impacts:
  - What are your biggest challenges in measuring and reporting air quality?
  - What are good practices that could be useful for others as well?
  - How do you deal with citizen science and low-cost measuring initiatives?
  - What role does climate impacts mitigation play in the debate in your city / region?
2. Engaging policy makers and politicians:
  - How do you get attention from policy makers, politicians? What works and what doesn't?
  - What is driving political interest: is it meeting the European norms? Or are health or / and city attractiveness arguments to go beyond these?
  - How do you engage with other city agendas – transport, health, spatial planning, energy etc?
  - How are ambitions in the city influenced by regional and national agendas?
  - What is the impact of the personal motivation / interest of the Mayor?
3. Policy communication and implementation:
  - What are the most successful examples of air quality and climate related policies in your city / region?
  - What are the most important ways to frame / communicate city / region policies towards citizens? What works and what doesn't?
  - Is there anything that you would like to implement but don't get political room for? How could you overcome that?
  - Where do you see 'easy to harvest' synergies between air quality and climate policies?
4. Citizen engagement:
  - Are citizens involved in climate and air quality discussions?
  - What are the most interesting initiatives integrating citizens in the air quality and climate debate in your city?
  - Was it helpful/successful/impactful?
